At the evening, 10 people (groups) including Su Xiaolin were awarded the 1st batch of Nantong moral models. Photo by Lu Zhaoxin

National Science and Technology Progress Award published ‘Island making equipment’ made by Nantong company won grand prize

By Wang Weili

On 10 January, good news came from the 2019 national science and technology award conference held in Beijing: ‘offshore large suction dredging equipment research, development and industrialization’ project led by Shanghai Jiao Tong University, and completed by Jiangsu Haix-

in Heavy Industries Co., Ltd and Jiangsu Haihong Construction Engineering Co., Ltd won the grand prize of National Science and Technology Progress Award. Offshore large suction dredging equipment is commonly known as dredger. It can dredge channels, fill soil and create land, and build port. It is a high tech ‘island mak-

ing equipment’. Since 2000, shipping and marine engineering design research institute of Shanghai Jiao Tong University solved difficulties and developed key technologies, developed more than 60 types of dredging equipment, formed a complete large suction dredger independent industrial chain, made the dredging capacity of China the top in the world.

Nantong port cargo throughput over 300 million tons last year

By Peng Junjun

Yesterday the reporter learnt from municipal transport bureau that 2019 Nantong port cargo throughput was 336.204 million tons, which was 25.9% more, over 300 million tons. Mineral construction materials’ increase is leading, 133.573 million tons was completed, which was 107.1% ; coal remains to be the second most type of mineral cargo, the throughput was 67.736 million tons, which was 11.6% ; fossil oil, natural gas and its products throughput was 23.017 million tons, which was 10.5% more; throughput of cement was

21.412 million tons, which was 16.4% more. The increase of the four main types of cargo created a solid found for the total throughput to exceed 3 million tons. ‘The target of Tonghai port is to become a domestic trade hub.’ manager of manufacture and operation department of Nantong Tonghai port Co., Ltd. Xu Dashan told the reporter. It is said that Tonghai port is the 1st port on the north bank when ships enter 12.5m deep water channel in the Yangtze River. According to planning, in 2022 the container throughput of Nantong Tonghai port will reach 2 million containers.

2019 Nantong ten pieces of big news published

1. Central Committee of CPC and State Council published planning and guideline of integrated regional development of Yangtze River delta. Nantong got new development opportunities which have not appeared for 100 years.
