Two Nantong projects listed in Yangtze River delta integrated development major cooperative matters

Jiangsu and Shanghai promote Tongzhou bay new estuary and Nantong new airport building

By Tang Xiaofeng

On 6 June, major cooperative matters signing ceremony was held at 2020 Yangtze River delta main cadres forum in Huzhou, Zhejiang. *Tongzhou bay new estuary building strategic cooperation framework agreement* and *Nantong new airport cooperation agreement* were signed on the conference. Mayor Wang Hui signed on behalf of Nantong govern-

ment.

According to the agreement, Shanghai commission of transport and Shanghai international port group will implement Yangtze river delta integrated development, support and participate in building and development of Tongzhou bay new estuary in aspects including planning, investment, construction, operation and management, help

Tongzhou bay new estuary become a major developed harbour of north wing of Shanghai international shipping center; Jiangsu transport department and Jiangsu port group will base on implementation of Yangtze River delta integrated development strategy, support Tongzhou bay new estuary building.

Nantong new airport, as an important part of

Shanghai international air hub, will form main hub of Shanghai multiple airports system together with Pudong airport and Hongqiao airport, will be planned, built, operated and managed together with Pudong airport and Hongqiao airport. In the future, according to the requirements in the agreement between Shanghai and Nantong, they will try to make it available for operation by the end of 'the fourteenth five year plan'.

China Import and Export fair online for the first time
372 Nantong companies participate

By Liu Lu

The 127th China Import and Export Fair and the 1st online China import and export fair will be held from 15 to 24 June. The reporter learnt from municipal bureau of commerce that all preparation works are done, 372 Nantong companies will participate and there are 573 booths.

The layout of exhibition zones referenced the fair last year. All contents will be online at the same time.

As the 1st online China import and export fair, there are specific requirements for information provided by the participating companies in aspects like regulations and numbers, for example: every company shall upload at least 10 representative products in every exhibition zone, the number of uploaded exhibits is unlimited; companies which have more than 1 booths shall upload five more products for each additional booth; at least 1 video shall be uploaded; every company can upload a VR virtual booth in every exhibition zone.

32 Nantong projects won 2019 Jiangsu Science and Technology Awards

By Wang Weili

On 10 June, Jiangsu CPC Committee and government held provincial science and technology award conference to award 2019 Science and Technology Award winners. 32 Nantong projects are on the list, and there are 4 first prizes.

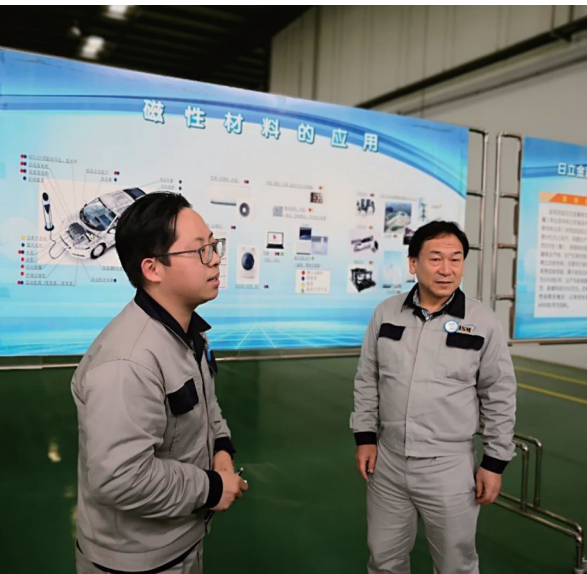

In terms of quality, Nantong has made significant progress. Nantong COSCO Shipping Engineering Co. Ltd. and Jiangsu Longyuan Zhenhua Marine Engineering Co., Ltd. won the 1st prizes as the 1st contractors. It is the 1st time Nantong companies won provincial science and technology award as the 1st contractors after 9 years.

Can attract metal of more than 640 times of its self-weight
San Huan Magnetics Co., Ltd.: make the best magnets

By Huang Hai

Hitachi Metals San Huan Magnetics (Nantong) Co., Ltd. is located at Zhongtai road, Qidong high tech zone. It was founded by Hitachi Metals Ltd. and Beijing Zhongke Sanhuan Hi-tech Co., Ltd. together in September 2016.

Hitachi metals, established in 1959, is the largest neodymium, iron and boron magnets manufacturer in the world.

Magnet is common in daily life, while neodymium magnet is a kind of magnet made from neodymium in tombarthite, iron and boron with high output function. General Manager of the company Kobayashi Hiroyuki said that the magnet is the strongest magnet in the world, can attract metal of more than 640 times of its self-weight. In the present, neodymium, iron and boron magnet is widely used in low carbon fields such as new energy vehicles and energy saving appliances.

Magnets produced by the company are used in Japanese companies in China, such as electric motors of Daikin Air-conditioning technology. In 2019, the output reached 150 tons and the sales were about 74 million Yuan.

As demand is more than supply, Hitachi Metals San Huan magnetics (Nantong) Co., Ltd. will expand production this year, add 50 million Yuan manufacture equipment. 'In 2024, the investment will be more than 15 times the number now.' Kobayashi Hiroyuki said.

Alibaba expanded Nantong project Increase 15 billion Yuan to build the largest data center in East China

By Chen Ke

On 28 May, Alibaba group and Nantong Economic & Technological Development Area signed agreement officially, planned to increase 15 billion Yuan for Alibaba Jiangsu cloud computing data center expansion project.

On 18 December 2017, Alibaba Jiangsu cloud computing data center project of 18 billion Yuan total investment was settled in Nantong Integrated Free Trade Zone.

Last November, the project started operation. Up to now 40 thousand servers are online. General Manager of IDC research department of Alibaba Gao Shanyuan said, 'Nantong data center serves all core business of

the group, including e-commerce, Alibaba cloud and finance. We hope that we can make Nantong the largest data center of Alibaba in East China to support the business growth in the next five years.'

On 6 June, drone took an aerial photo of Nantong central innovation district. Nantong theatre, Nantong art gallery and other buildings presented their new look.
