## 2021 Nantong Jianghai talents entrepreneurship week open

By Zhu Wenjun and Li Tong

On 29 November, ‘talent meets Jianghai’ 2021 China Nantong Jianghai talents entrepreneurship week and scientific and innovative industry talent development conference hosted by CPC Nantong Committee and Nantong government was open at Nantong international conference center.

Secretary of CPC Nantong Committee Wang Hui and acting mayor Wu Xinming published *policies about improving youth and talent friendly city development index* together.

Experts and scholars such as Academician of Chinese Academy of Engineering, winner of national Highest Science and Technology Awards Wang Zeshan attended the opening ceremony.

Wang Hui said that Nantong will use genuine and sincere attitude, real action, cold hard cash, to promote a series competitive supporting policies,

build multiple level housing supply system from ‘one bed’ to ‘one room’ to ‘one apartment’, improve public service supporting functions, to provide maximum support for talents who come to Nantong to start business.

In 2021, 71 Nantong people are shortlisted in Jiangsu innovative and entrepreneurial talents, and 87 people are in municipal Jianghai talents.

On the conference, riverside science and innovation belt planning was published. ‘Nantong science and innovation belt’ experts think tank was founded on the same day. 10 experts such as Previous director of High tech innovation Department of the Ministry of science and technology Zhao Yuhai and Zhong Weijun from Southeast University were recruited as the first batch of experts think tank members.

It is the 11th consecutive year Nantong held Jianghai talents entrepreneurship week. Apart from the opening ceremony, more than 10 theme events were held.

On 28 November, Yangkou harbour LNG port received the 500th berthing LNG transport ship ‘Alan’. At 5: 48 pm on that day, 4 unloading arms of China National Petroleum Corporation Jiangsu LNG receiving terminal were connected with ‘Alan’. 160 thousand cubic meters liquid natural gas from Australia were transported to gas pipe, and entered T-1201 gas storage tank on Yangguang island.

na-Russia east line natural gas pipeline Yangtze River tunnel boring machine crossing project ‘Changtong’ tunnel boring machine bored in total 1003.5m in November, which broke the world record of fastest boring in one month.

## Overseas Nantong one stop integrated service platform online

### ‘Nantong e Haitong’ provides whole process service for students studying abroad

By He Jiayu

On 1 December, overseas Nantong one stop integrated service platform – Nantong e Haitong was online officially. The platform uses wechat public account ‘Nantong e Haitong’ as a carrier, will provide relevant policy information for Nantong students before studying abroad, studying abroad and those who have returned home, to realize the core idea of ‘one platform for domestic and foreign integrated services’.

Last September, Nantong foreign affairs office called departments including talents office, educa-

tion, public security, human resources and social departments to discuss, and initiated ‘overseas Nantong one stop integrated service platform’. All the departments focused on general plan, provided suggestions and comments, worked actively, did a lot of effective work. Students studying abroad integrated management service system has been built on the platform, to provide guidance and supports in several aspects including learning, life and employment for students who are studying abroad.

It is learnt that ‘Nantong e Haitong’ includes 3 modules which are preparation before

setting off, studying abroad safely and returning after graduation. The aim is to help students studying abroad solve questions about schools selection and preparation before leaving, provide guidance about safety for students studying abroad, present Nantong talent policies to returned students, attract more excellent talents to return to Nantong to work and start a business, add fresh power for long term innovation development of domestic and overseas Nantong companies, to play an active role in helping in Nantong’s talent attraction work and economic and social development.

## Nantong cultural tourism (Japan) promotion conference held

By Li Bo

On 1 December, Nantong culture, radio and tourism bureau held Nantong cultural tourism (Japan) promotion conference at administrative center. The promotion meeting has meeting halls in Nantong and Tokyo of Japan. Cultural tourism products promotion and communication were realized by online connection.

In the present Japan has become the largest source of inbound tourists and the second largest foreign investment source of Nantong. By the event, both parties worked hard to achieve complementary resources, information sharing and mutual benefits, worked actively for cross border tourism after the epidemic together.
