

Nantong report

Tongzhou bay new estuary major harbour area harbour No.3 port 1#-3# was started

By Wu Yinhua

On 30 December 2021, Tongzhou bay new estuary major harbour area harbour No.3 port 1#-3# was started officially. Tongzhou bay new estuary major harbour area harbour No.3 port 1#-3# project is located at the west coastline of south side of harbour No.3 of Tongzhou bay north area. The total investment of the project is about 2.52 billion Yuan. The construction period is 27 months. There will be 2 one

hundred thousand tons grade and 1 fifty thousand tons grade general berths (200 thousand ton capacity in hydraulic structure) and relevant supporting facilities. The quay length is 923 m, which can satisfy the needs of berthing 1 200 thousand tons ship and 2 50 thousand tons ships at the same time. After completion, the annual throughput will reach 22 million tons. Supporting approach dyke is connected with the channel of new estuary phase 1. It will make a solid foundation for deep water harbours in Nantong.

Yangkou Port energy island China National Petroleum Corporation Jiangsu LNG receiving terminal

Received and unloaded more than 10 billion cubic meters in 2021

By Yang Xinming,Xu Shuying and Wu Xia

On 30 December 2021, Q-Flex type LNG giant ship which was loaded with 91 thousand tons liquid natural gas completed unloading work, and left Yangkou Port China National Petroleum Corporation Jiangsu LNG port. Up to then, Jiangsu LNG receiving station has received and unloaded more than 10 billion cubic meters natural gas over the year, which broke the record in history.

RCEP became effective on 1 January Nantong issued first batch of 12 'economic passports'

By Liu Lu

On 1 January, workers of Toray Polytech (Nantong) Co., Ltd. were busy applying for an 'economic passport' for one batch of textile products which would arrive in

Japan urgently - RCEP preferential certificate of origin. With the certificate, the products of the company can enjoy 4.3% tariff relief in Japan. On 1 January, Regional Comprehensive Economic Partnership (RCEP) was implement-

ed in 6 ASEAN members which are Brunei, Cambodia, Laos, Singapore, Thailand, Vietnam and 4 non-ASEAN members which are China, Japan, New Zealand and Australia. After RCEP takes full effect, more than 90% of the cargo be-

tween approved members will have zero tariff. In the present, Nantong Customs and Nantong council for the promotion of international trade can issue RCEP preferential certificates of origin for Nantong companies.

China Russia natural gas cross Yangtze River TBM segments made in Nantong

By Zhu Bingyan

On 30 December 2021, on the bank of the Yangtze River, rows of neatly placed segments were waiting to be transported to construction site. In the emulation drive which was just completed, China Russia natural gas pipeline tunnel boring machine cross Yangtze River project created

a world record of 1003.5 m boring length per month of slurry TBM. It provided a solid support for Nantong railway construction components Co., Ltd. which produces tunnel boring machine segments for 'the longest tunnel in the Yangtze River' boring project, to ensure the smooth progress of the national project. Up

to 29 December 2021, China Railway Tunnel Group Yangtze River tunnel boring machine project department had used 2302 rings of segments. The length was 3453 m and the depth was 50 m. All the segments were made in local companies. China Russia natural gas pipeline cross Yangtze River project re-

quires in total 6799 rings, 6 pieces of segments for each ring. The production data from Nantong railway construction components Co., Ltd. shows: 3523 rings have been delivered, from 31 December to the day of completion of the cross Yangtze River project, 3276 rings will be manufactured.

Briefly

A few days ago, Nantong rail transit line No.1 overhead lines project thermal sliding test was completed successfully, which created a solid foundation for future joint debugging and joint test. Line No.1 phase 1 project will be open and trial operation will be started in the second half of 2022. Line No.2 phase 1 project will be open for trial operation in 2023. Photo by Xu Congjun

During New Year holiday, the two day 2022 'industrial and commercial bank of China cup' Yangtze River delta Automobile and motorcycle field cross-country League was held at Tongzhou flower town race track. More than 30 cross-country teams and close to 200 professional racing cars from places all over the state were running here at a fast speed, with passion burning.
