## Rail transit line No.1 art wall plan published

Thriving city effect drawing

picturesque Jianghai effect drawing

Zhang Jian culture effect drawing

By Jiang Jiaojiao

Nantong rail transit line No.1 will build culture and art walls in 3 stations which are Hepingqiao station, Youyiqiao station and Wenfeng station. A few days ago, the design plan of the art walls were published.

The design of the culture and art walls invited a well-known design team in China.

The work took one year.

The theme of Hepingqiao station is ‘picturesque Jianghai’. Hepingqiao station is the interchange of rail transit line No.1 and No.2. It is located in the center of the old city area of Nantong, surrounded by Nantong television tower, Hao river scenic spot etc., with Jianghai characters. The art wall will present the scenery of Nantong in a panoram-

ic way, the center of the painting is Hao river and Wushan scenic spot; the distant view is modern Nantong city.

The theme of Youyiqiao station is ‘Zhang Jian culture’. Youyiqiao station is located at the cross of Renming middle road and Huancheng east road, modern China buildings such as bell tower square and Qiao building are nearby. The de-

sign plan of the art wall will be presented by the 23 ‘first’ elements created by Mr. Zhang Jian in Nantong.

The theme of Wenfeng station is ‘thriving city’. The art wall selected demonstrative landmark building representatives of Nantong, to present the history and scene of development of business and commercial areas in old and new city area of Nantong.

## Identify more than 3500 species with a casual photo taking ‘Nantong biological map App’ published

By Zhu Beining and Peng Junjun

A few days ago, ‘Nantong biological map App’ was

launched in Nantong. Seeing unknown flowers and grass, citizens only need to take a photo at convenience, to identify more than 3500 spe-

cies alive in Jianghai plain with the help of the software. It is learnt that it is the first ‘biological map’ app in Jiangsu.

## Nantong deaf painter completed anti-epidemic painting works

By You Lian

Comrades by his side, homeland behind him... Nantong deaf painter Zhu Yupei did 3 computer painted anti-epidemic theme works in home quarantine in Shanghai Pudong, to pay respect to front line anti-epidemic medical workers.

Zhu Yupei is the founder of Shanghai Weizuo culture and media Co., Ltd., well-known deaf painter and designer. He graduated from Nantong blind and mute school (the precursor of Nantong special education center) in 1999. When he was 3 years old, he

lost hearing due to drug poisoning, and could not speak. He studied in Nantong blind and mute school from kindergarten to polytechnic, and was admitted to Jinling Institute of Technology.

After Zhu Yupei graduated from university, he worked as ‘Ai Bi Lin’ visual director of *Xinming evening news*. ‘I pay attention to news every day, to know relevant information about the epidemic at real time.’ Zhu Yupei said the he felt the power of China in national anti-epidemic move and the hardness of front line medical workers vividly, and had

a rush for drawing, created 3 computer painted anti-epidemic works in 2 days.

Zhu Yupei said that he planned to hold personal painting exhibition in the middle of the month, to present 15 ‘the Peach Garden in the city’ theme works. ‘I heard from the news that medical teams from places over the state came to Shanghai, I am very impressed.’ Zhu Yupei said that he treated the home quarantine as ‘isolated’ practice, practiced and created new works every day, believed that in the near future everything would go back to normal.

## SHW settled in Haimen

By Chen Jing

On 1 April, Haimen economic and technological development area and SHW group from Germany held ‘cloud signing’ ceremony of new composite break disc project.

SHW group from Germany was established in 1365. It is one of the industrial enterprises of longest history in the world. It manufactures and sells products including automobile hydraulic pump, oil pump, and break disc. It is also one of the largest pump and break disc manufacture enterprises in Europe.

The total investment of the new composite break disc project signed this time is 30 million U.S. dollars. After the project reaches design production capacity, the estimated annual sales will reach 310 million Yuan, and annual tax will be about 15.6 million Yuan.
