

Nantong report

‘Rescue bamboo pole, really helped a lot’

By Zhao Yongjin

At the north end of Hai’ an Binhai new district Wuling middle bridge, two bamboo poles of about 5 m length were lying still under the rail. ‘It is the rescue bamboo of the police station. We did not expect that it really helped a lot.’ at 14 July noon, secretary of CPC Committee of Wuling village Gu Haiyan said, pointed at Cai Xiaoqin who stood next to him, that he was the first person in Hai’ an to use the ‘rescue bamboo pole’.

Cai Xaiqin, is a resident of Wuling village. Two years ago, he was transferred from Wuling village to Wuhu village, as secretary of CPC Committee. He went from home to visit villagers of Wuhu village every day.

‘Help, someone fell in the water, sinking to the bottom!’ on 9 July morning, as Cai Xiaoqin passed Wuling middle bridge, he heard people cry, and got off the car to take a look. He found out that one head was swaying in the water at the cross section of Changjiao river and Zhongling river.

The old man had a panic look on his face. He tried to

struggle to the bank, but could not make it. Under the emergency, Cai Xiaoqin called out, ‘quick, take the bamboo pole.’ as he was saying, he took the bamboo pole and went to the bank of Zhongling river. Villager of Wuling village Miao Xiushan went to the opposite Changjiang river bank to look for small ferroconcrete ship. At that time, cleaner of Shuanglong village Li Zhilin who heard the cry also came with a boat.

The common bamboo pole, played an important role in the rescue.

Hai’ an is located at Lixiahe area, with dense water network. As the temperature increases in summer, risk of drowning has increased greatly.

Hai’ an public security bureau promoted ‘rescue bamboo pole’. Since 1 July, it was implemented by various police stations, and put in water area where drowning is likely to occur. Up to now, more than 10 thousand bamboo poles have been put.

The length of ‘rescue bamboo pole’ is usually more than 5 m and its diameter is larger than 3 cm. It is straight, with smooth ends and surface, without sharp points or burr, will not create secondary injury to the rescue.

Wind turbine blades which were ‘made in Nantong’ went abroad

By Peng Junjun

‘Set sail!’ at about 11:30 am 13 July, as the captain commanded, Antigua and Barbuda ship ‘emerald’ completed loading work of 27 wind turbine blades, left Haimen Dongzhao harbour slowly, went for Finland (right picture,

taken by Du Yixiong and Yang Zhigang).

In the past few years, Nantong has been working on building national wind power generation and equipment manufacture base. Haimen Dongzhao harbour is one of the harbours which are closest to ‘made in Nantong’ offshore wind turbine blade

origin place —— Haimen Aeolon wind power technology development Co., Ltd. Setting off from Dongzhao harbour, can save a lot of transport cost for enterprises. In the present, more than 80% of Haimen Aeolon wind turbine blades products were exported from here, and sold overseas.

Since 15 July,new round of ‘medical insurance Nantong insurance’ available

By He Jiayu

‘Medical insurance Nantong insurance’ 2022 enrollment was started on 15 July. Citizens with needs can purchase by multiple ways including ‘medical insurance Nantong insurance’ wechat public account, and Nantong Medical insurance App, from 15 July to 15 August. Last May, customized preferential commercial supplementary medical insurance —— ‘medical insurance Nantong insurance’ was launched, with no restrictions on age, past disease history, extended beyond medical insurance list and types of diseases, benefited insured people, and reduced the medical burden of insured people by multiple

layers of medical insurance system.

Last year, the maximum compensation was 223.5 thousand Yuan. In less than a year, ‘medical insurance Nantong insurance’ issued compensation to half a year old baby, and reduced the medical cost burden of 101 years old man. About 40 % of the compensated people have previous medical history.

Emergent rescue

By Yang Wanli

On 9 July, Rugao immigration inspection station saved 1 Philippine injured crew member urgently. At 3 pm on the day, one Philippine crew member of Marshall Islands ship ‘Trans ocean’ berthed at Rugao harbour Ruitai Nantong port fell from a high place while working in the cabin, due to faint under high temperature. He was not able to move and needed immediate medical treatment.

Learning the condition, Rugao immigration inspection station started crew emergent rescue plan in epidemic period as soon as possible, processed inspection procedure, and assisted in sending him to the hospital.

With one card, citizens can enjoy 15 major projects in the city area ‘Chongchuan cultural tourism e wallet’ launched

By Zhang Shuilan

On 13 July, ‘Chongchuan cultural tourism e wallet’ was launched officially. Citizens can enjoy 15 projects including scenic spots, catering, and entertainment in Chongchuan district with ‘one card’.
