National Demonstration Base List published Zhongyang Group shortlisted

By Tang Jiamei

A few days ago, Ministry of Agriculture and Rural Affairs published the list of the first batch of Establishments of Agricultural High-quality Development Standardization Demonstration Project (National Modern Agricultural Full Industry Chain Standardization Demonstration Base). Jiangsu Zhongyang Group Co., Ltd. (product: Puffer fish) was shortlisted. It is the only Nantong enterprise shortlisted.

Zhongyang Group has cultivated ‘Zhongyang No.1’ new species of puffer fish, drafted the puffer fish series national standard, mastered core technologies of puffer fish: ‘artificial propagation, poison control and healthy culture’, formed a complete industrial chain: ‘technological development, seed fish germplasm, seed fish breed, ecological culture, nutrient fodder, and product processing’, has national puffer fish seed field and national puffer fish culture industry well known brand demonstration zone.

Nantong kite appeared on ‘national name card’

By Yang Zhenxiao

On 9 September, *Kite (III)* special stamp was issued. The set includes 4 stamps, including one stamp of Nantong Banyao kite pattern. It is the 3rd time to launch kite theme stamp after special stamps *Kite (I)* issued in 1980 and *Kite (II)* issued in 1987. It is also the first time Nantong Banyao kite

is used as the subject of the stamp.

In the set of stamps, the stamp pattern with Nantong kite characters is called ‘Ruishi Ruyi’. It was created by Guo Chengyi, inheritor of national intangible cultural heritage Banyao kite.

Nantong is one of the four major kite producing areas in China. It is also the major producing area of southern kite.

Looking at reduction of carbon emission in enterprises, and looking at greening by the Yangtze River

First stop of ‘Jiangsu Visit of Envoys to China’ came to Nantong

By He Jiayu

On 4 September, walking into the hall of Zhongtian Technology group, there was a very eye-catching display board of ‘850 days to carbon tax implementation’, waiting for the envoys to China from various countries who came to participate ‘Jiangsu Visit of Envoys to China’ in Nantong.

To serve local high quality development and high-level opening up, and promote expansion of international cooperation channels of major projects, Ministry of Foreign Affairs organized 11 countries’ envoys to China including New Zealand and Israel, to come to Jiangsu for ‘Jiangsu Visit of Envoys to China’ event whose theme is ‘technology and innovation in Jiangsu, zero carbon emission in the future’. Nantong is the first stop of the event.

Zhongtian Technology Group is the first enterprise of the visit. The guests entered Zhongtian Techno-

logy cultural brand exhibition hall, got to know the conditions of Zhongtian such as development progress, industrial panels, and global layout, especially products, technologies and layout of panels including optical fiber and photovoltaic new energy.

‘As a private enterprise, it has a development strategy with a national perspective, and has been exploring new fields continuously. This is the point which impressed me most.’ Irit Ben-Abba, ambassador of Israel to China said that Israel and Jiangsu had always been cooperating, this time they came to look for opportunities, ‘I hope that we can have cooperation in more fields with enterprises in Jiangsu and Nantong.’

At Wushan Binjiang Ecological Area, the guests took miniature train to cross the forest, and stepped on the trail by the Yangtze River, recorded the beautiful scene of the Yangtze River with mobile phones, and took photos with the

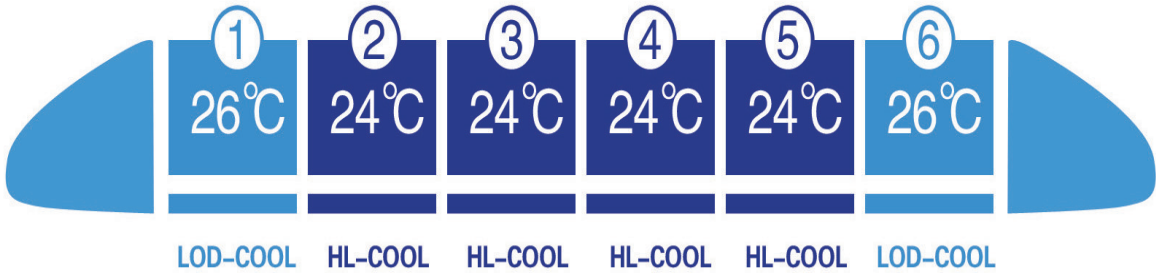

Yangtze River.

‘Wushan National Forest Park is very beautiful. It was built along the Yangtze River. And the Yangtze River is the mother river of Chinese people. I am very glad to visit here.’ knowing that the park was built a few years ago, under-

went a lot of wharf and factory relocation, and large scale of ecological restoration, it finally became what it is now, Grahame Morton, Ambassador of New Zealand to China had a lot of feelings, ‘It is not only the development of the city, but also people’s need for a better life.’

Nantong Rail transit Line 1

Different temperatures in the same train

‘cold or warm carriages’ can be selected while taking the underground railway

By Jiang Jiaojiao

The reporter learnt from Nantong Rail Transit that Metro Line No.1 launched ‘different temperatures in the same train’ zone temperature control pattern, to satisfy the differentiated demand of different passengers.

Nantong Metro Line No.1 is

marked with strong cold and weak cold modes, relevant person in charge of the Rail Transit group introduced that among the carriages, Carriage 1 and 6 are set as weak cold carriages, the temperature of the carriages is set to 26 °C; Carriages 2, 3, 4, and 5 are set as strong cold carriages, the temperature of the carriages is set to 24 °C.

How to tell strong cold carriages from weak cold carriages? On the platform barrier doors, signs of ‘strong cold and weak cold carriages layout’ are pasted. At the end of every carriage, signs of ‘strong cold or weak cold carriages’ are pasted. Passengers can choose carriages which suit their needs for apparent temperature to enter.

‘Liquor flavored latte’ is not for everyone

By Li Bo

On 4 September, co-branded coffee ‘Maotai Luckin liquor flavored latte’ launched by Guizhou Maotai and Luckin Coffee together was on sale. Many citizens went to purchase and try. However, experts reminded that special populations such as pregnant women, lactating mothers and children could not drink!

‘Although the alcohol content of Maotai Luckin liquor flavored latte is less than 0.5%, but we do not recommend the under-age people, pregnant women, drivers, and those allergic to alcohol to drink!’ He Shuang, attending doctor of Stroke Center of Affiliated Hospital of Nantong University reminded.

What are the advantages of drinking coffee? He Shuang said that firstly it was good to reduce weight. With muscular movement, caffeine can accelerate the decomposition of fat. Secondly, it has antioxidant effect. Antioxidant substances contained in coffee can work against cardiovascular diseases. Apart from that, caffeine is a stimulant. That is the major reason why many people like coffee. Coffee can keep people energetic, but if you drink in late hours, it might disrupt sleep and trigger health problems.
