## The brand bookstore with the largest operating area in China Jihe Bookstore opened in Nantong

“As the brand bookstore with the largest operating area in the country, Jihe Bookstore is a composite bookstore which integrates reading, art exhibitions, cultural salons and handwork DIY.

By Xia Zhaofen

On 30th April, Jihe Bookstore located at Zilang Xintiandi, Nantong Innovation District made its debut. The total area of the bookstore is 600 square meters. It adopts a black and white minimalist style, matched with a unique atmosphere that creates a sense of mystery, fun, and curiosity. It integrates and intersects points, lines and planes, to form an

upward inverted V-shape ‘arch’ top, creating Gothic architectural features — ethereal, tall and sharp. As the brand bookstore with the largest operating area in the country, Jihe Bookstore is a composite bookstore which integrates reading, art exhibitions, cultural salons and handwork DIY. Up to now, Jihe Bookstore has had 1 million online and offline followers over the state, covering 30 cities (regions).

## CIMC Sinopacific Offshore & Engineering got a new order from an old client

By Huang Hai

Recently, Nantong CIMC Sinopacific Offshore & Engineering Co., Ltd. and Avenir LNG Limited signed the order of two 20,000 cubic meters LNG transport and bunkering ships successfully. The ship type of the new order was designed and built independently by CIMC Sinopacific Offshore & Engineering. Its overall length is 160 meters and the moulded breadth is 25 meters. The design speed is 15.5 knots. In the past few years, CIMC Sin-

opacific Offshore & Engineering has successfully delivered two 20,000 cubic meters LNG transport and bunkering ships and two 7,500 cubic meters LNG transport and bunkering ships to Avenir LNG. It is worth mentioning that the 20,000 cubic meters LNG transport and bunkering ship cooperated previously was not only the largest LNG bunkering vessel in the world at that time, but also the first ship in China which refuels LNG for international ships. It can transport LNG, and refuel LNG for other ships and terminals as well.

## Equipment for the port project transported from Nantong to Peru

By Wu Xiaoyun

A few days ago, the ship ‘Fu Zhou Guo Ji’ loaded fully with 5 automatic stacking cranes set off to Peru, far away in South America. Zhong Binghua, a project manager of Shanghai Zhenhua Heavy Industries Nantong branch, introduced that the project was for COSCO Peru Chancay Port, and there were in total 15 automatic stacking cranes. The voyage was the first batch. COSCO Peru Chancay Port faces the Pacific Ocean. It is an iconic

project of China and Peru’s joint building of ‘the Belt and Road’. It is also the first port managed and operated by China in South America. After it is completed, it is expected to become a local smart gateway to the world. It is expected to receive over 18 thousand TEUs container ships, and realize an annual throughput of 1 million TEUs, 6 million tons of general cargo and 160 thousand vehicles. It can inject new vitality into the trade between South America and China, and become a new connection point of China and Peru’s economic and trade exchanges.

## Dragon boat race

On 8th May, international students of Nantong College of Science and Technology from countries including Pakistan, Bangladesh, Vietnam and Indonesia rowed dragon boats on Hao River, experiencing the folk customs of Dragon Boat Festival. Photo by Xu Peiqin

## Chinese and Russian university students experienced dragon and lion dance together

By Xu Congjun

On 8th May, students from Nantong University and Bunin Yelets State University held a friendly table tennis match between Chinese and Russian students. The Russian students also deeply experienced fencing skills and dragon and lion dance at the fencing hall and the stadium.

This year marks the 75th anniversary of the establishment of diplomatic relations between China and Russia. The teachers and students delegation of Bunin Yelets State University, which includes 11 people, will carry out one week visit and exchanges in Nantong University. During the period, events including course experience, cultural perception, skills exchanges, and visits will be carried out.

## Qidong ‘low altitude flight’ sightseeing tourism flight opened

By Huang Hai

Recently, an American Robinson R44 helicopter made a successful trial flight at Qidong Jiang Hai Lan Wan Resort. On the trial site, after the routine inspection before taking off was completed, the pilot started the engine. The helicopter rose from the ground, and flew at low altitude according to the sightseeing route. Scenes of Qitang City and the coastal zone came into view. ‘After taking off, the flight altitude is below 300 meters. Coastal scenery within a radius of 5 to 10 kilometers will come into view. The flight period starts from sunrise to sunset. We welcome people to experience different Qidong scenery from the air.’ Song Yahui, Captain of Dongling Airlines introduced. The American Robinson R44 helicopter used for this flight was manufactured by the Robinson Helicopter Company in the United States. It is one of the most widely owned helicopters in the world. It can carry 4 people, including 1 pilot and 3 tourists. At present, the ‘low altitude flight’ sightseeing trip has been open to citizens and tourists. Tourists can go to Qitang City Scenic Spot to experience it.

### Fishing moratorium

From 12 o’clock on May 1st, 2024 marine summer fishing moratorium started. It will last four and a half months. All 670 Qidong fishing boats which should rest have returned to ports for the summer moratorium. Photo by Jiang Xinchun

Nantong badminton player Shi Yuqi held the Thomas Cup

By Li Bo

On 5th May, Chinese Men’s Badminton Team, whose leader is Nantong badminton player Shi Yuqi, defeated the Indonesian team at Chengdu High Technology Zone Sports Center with a total score of 3-1 in the final of 2024 Thomas Cup Badminton, and won the championship of the tournament. Chinese Men’s Badminton Team held the Thomas Cup for the 11th time.

By Li Bo

On 7th May, Jiangsu public medical institutions above the second level started to implement general outpatient ‘one registration for three days’ practical plan benefiting people. 29 Nantong public hospitals above the second level also all implemented the plan.

‘One registration for three days’ practical plan benefiting people means that when patients go to public medical institutions above the second level (including hospitals of Chinese medicine, women’s and children’s healthcare hospitals, children’s hospitals, etc.) and register for one general outpatient visit, if they cannot complete diagnosis

and treatment on the same day or cannot obtain reports, they can bring reports to the same department, same branch of the same hospital for subsequent visits within three days (including the day they first register). There is no need to register again, and they can enjoy the exemption from general outpatient consultation fee (registration fee) policy.
